Speech and
price control

Various payment
options

Easy installation

A white, multi-jointed robotic arm is positioned in a kitchen-like environment. In the background, a menu board displays three items: "COFFEE", "WATER COFFEE", and "FLAVOR COFFEE". The scene is dimly lit with blue and white highlights.

Serves highest grade, chewy gelato-style soft ice cream to your customers & get your brand popular instantly!

Freshly ground coffee brewed to perfection by fully automated coffee machine is like having a barista that performs with sharp 100% consistency 24 hours a day!

Robocafe V2 performs tasks by responding to instructions made by kiosk touch screen or a web application.

Robocafe V2 performance is monitored in real-time by the App in your smartphone and web application.

What can ROBOCAFE V2 do?

STAFF FREE MODE

Our technology reduces labor costs while giving high quality barista-level service – 24 /7.

ALWAYS GOOD MANNERS

The robot jokes with visitors, attracts attention and invites them to buy.

AUTO-MODE

The kiosk works completely autonomously, without human intervention.

VARIOUS PAYMENT METHODS

Accepts various payment options such as card payments, e-payment via web site, Apple Pay, Samsung Pay etc.

100% AVAILABILITY

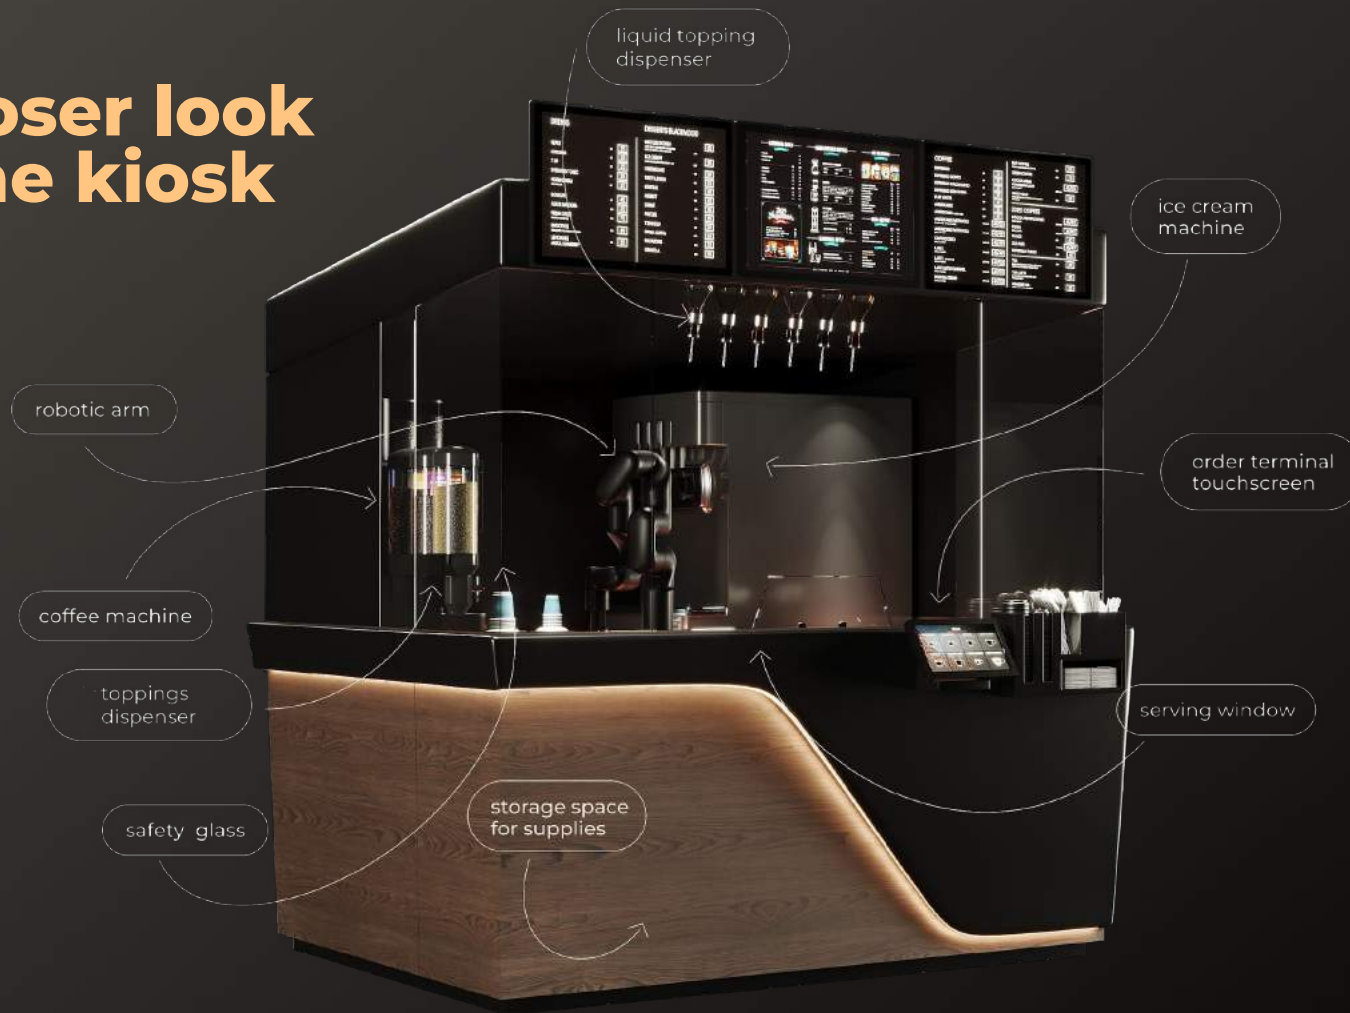

Follows instructions received from application or touch screen.

MODEL VARIETY

In addition to having few design types our models are made to order and can sell coffee, ice cream and even bakery.

A closer look at the kiosk
